

Project: Gold Dust Mines

To: Rebecca Anderson  
Acting minerals/Geology program Manager  
NezPerce-Clearwater National Forests

4-9-2017

Concerns:

- 1) Monitoring the project are yearly for noxious weeds. There is no time frame for monitoring, how many years? Who will be doing this and who will cover the cost of removal or control of any noxious weeds found? I feel the cost should be borne by the claimant and the monitoring by the agency.
- 2) There should be a bond posted by the claimant refundable after all inspections are satisfactory.
- 3) after the washing of vehicles and equipment, they should be inspected before entering public land.

Thanks for the opportunity to comment,
